

#1 Rated Voice Biometrics Technology

Modernize customers and employees authentication with our seamless, voice-based speaker recognition solution. Our advanced NIST top-ranked technology ensures maximum accuracy, regardless of the text and language.

3-Second Record Voice Authentication

Experience the market's fastest passive-voice authentication, delivering swift and secure access in just 3 seconds.

Language-Agnostic Verification

Verify any phrase or language effortlessly with our advanced voice biometric solution, freeing users from memorization or repetitive prompts.

#1 Ranked Voice Solution: NIST-certified!

Our internationally acclaimed biometric engine is the world's best commercial solution, securing #1 position from NIST, making it a leader in the market.

Enhanced Audio Analysis

Configurable calibration modes for optimal verification and identification results in all use cases.

Effortless Integration

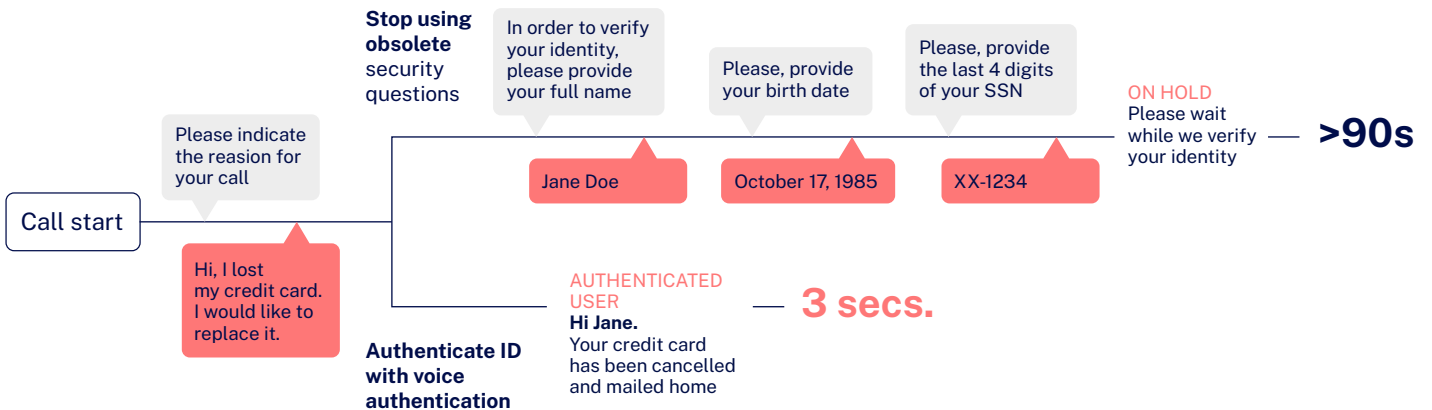

Deploy the solution in any environment or communication platform in hours, thanks to our easy-to-use cloud service.

Tailored solution

Tailor calibration modes to your specific use cases for ideal verification and identification results that match your unique requirements.

/Your new customers will embrace voice authentication

Verification without biometrics

- ✗ **Long (and costly) processes**
Knowledge-based verifications take 60-90 seconds per call
- ✗ **Multichannel limitations**
No unique identification across all channels
- ✗ **Uncertain identity**
Only verifies information, not the person's identity
- ✗ **Compromised security**
Vulnerable to impersonation with known information

Verification with biometrics

- ✓ **Natural cost-effective authentication**
3-second authentication while the person converses
- ✓ **Omnichannel capability**
Voice verification across any channel (phone, chat, app)
- ✓ **Real identity verification**
Biometrics uniquely and differentially identify each person
- ✓ **Maximum security**
Over 99.9% accuracy with anti-fraud systems

/Instant Deployment Across Platforms

Deploy the solution in any environment or communication platform in hours, thanks to our easy-to-use cloud service.

Backed by the trust of leaders from various industries, our ability to prevent fraud, maximize conversions, optimize costs, and enhance user experience is genuine and supported by concrete results.

BANKING

“In addition to **cost savings and improved security**, the technological capabilities brought to us by **Veridas** allow us to enable new businesses that were unthinkable four years ago”

Juan Francisco Losa
Chief Technology
Security Officer

UTILITIES

“Customer satisfaction has grown more than **20%** during the implementation of the voice biometrics solution. More than 65% of our clients who can use this solution (more than 200,000) have freely agreed to use their voice print”

Javier Vargas
Innovability Global
Digital Solutions Leader

INSURANCE

“Voice biometrics reduces more than one **95% customer verification time**. The average busy IVR time is 90 seconds with traditional methods, while with this solution it becomes 5 seconds”

Héctor Estella
VoIP Manager
en Mutua Madrileña

TELCOS

“No other solution in the market provided us with the **same quality of UX**, thanks to the minimal time required for **registration** and verification while guaranteeing **such a high level of accuracy, with minimal error rates**”

Bernhard Hochstätter
Executive Product
Manager

MORE SUCCES STORIES

Cost Savings and Operational Efficiency

Save costs and streamline operations in your contact center with voice biometrics. Eliminate manual customer identity verification, minimize call transfers, and reduce call times.

Improved Customer Satisfaction

Say goodbye to complex passwords and security questions. By reducing authentication time and effort, customers can effortlessly authenticate themselves using their voice.

Faster and More Secure Authentication

Authenticate customers within seconds, eliminating the need for additional verification steps. Enjoy a seamless customer experience while minimizing the risk of fraud.
